

Landscape Hardwood Care

Maintenance Guide

for 103T70 , 105T70 & 105TS

v3/13

As with any natural wood product, a certain amount of care must be taken to insure its longevity and lasting beauty. At James Loudspeaker our natural Teak Landscape Systems are no different.

Clean your teak planter boxes regularly, whether it is brand new or gray from years of aging, proper cleaning is a key to prolonging the wood's life.

Always use a soft rag or sponge with a mild cleaner for quick clean ups. For messes that may stain the wood, like bird droppings, use a mild furniture cleaner & a copper scrubber.

Teak is a naturally golden commonly used tropical hardwood. It is a very oily wood that resists rot and warping as well as expansion and contraction due to extreme weather conditions.

Over time however, teak will take on a silvery-gray appearance due to exposure to the elements. Some will prefer this weathered look and can maintain it by consistently wiping off the natural oil produced by the teak.

If you wish to maintain your James Loudspeaker Teak Planters natural brown color you may do so thru proper cleaning & oiling. The Teak planter boxes should be oiled every 6-12 months to maintain its natural beauty so it will last for generations.

First lightly sand the surface with the woods grain with a fine sandpaper to remove the old grey cells that cause the graying; then wipe away the dust with a slightly damp cloth.

Applying several coats of oil to soak into the wood will allow the oil to form a protective layer and maintain its originals honey brown color.

We recommend the use of teak or tung oil both of which are natural products and will not damage the wood.

10" Subwoofer with 2-Way Stereo Planter Box Speaker - 70V

The 105TS70 is a unique high performance 2-way outdoor planter box speaker in an attractive planter design and provides full range performance from 45Hz to 20kHz and can be used in pairs/multiples or as mono units. The enclosure is constructed of rugged 5052 aircraft aluminum and the decorative side slats can be ordered in teak wood, polished solid aluminum or painted to order.

The top of the planter is a fully drained potting area to allow a multitude of decorator options. Internally, the 105TS70 features a 4" x 8" horn loaded midrange, 1" Neodymium dome tweeter and a 10" 101ST4 style downward firing subwoofer.
